

Fiducian Geared Australian Shares Fund

Monthly Report - September 2023

Fund description

The Fund invests in a diversified group of specialist Australian Share managers. The Fund utilises the Fiducian “Manage the Manager” process, carefully selecting best of breed managers with different styles with the aim of achieving superior returns with reduced risk.

In this Fund, the underlying managers can borrow against the investor’s assets in the fund to purchase additional shares and provide a leveraged exposure. This can amplify returns in rising markets, and magnify losses when markets decline.

Share investment can be volatile over the short term, especially when geared, and the recommended holding period is at least 9 years.

Fund facts

Portfolio manager: Conrad Burge

ARSN: 105 996 192

APIR code: FPS0011AU

Benchmark: ASX 200 Accumulation Index

Current fund size: \$14 million (September 2023)

Management cost: 1.12%

Total management costs: 1.45%

Application/Exit fee: Nil

Monthly Report - September 2023

Market Commentary and Outlook

The global economy remains sluggish due to severe measures taken by monetary authorities to reduce inflation. While inflation is slowing, manufacturing and service industry activity levels and retail sales point to a general slowdown in activity. However, employment levels remain high and need to come down further and this, along with an uptick in inflation during September could see interest rates rise further and stay higher for longer.

This realisation that inflation has not yet been tamed saw bond yields jump up during the month, with both US and Australian 10-year government bond yields increasing by approximately 0.5%. This had negative flow-on effects on most asset classes. The broad US market (S&P 500 index) declined by 4.9%, and the Australian stock market (ASX 200 index) declined by 2.8%. Interest rate sensitive sectors had the largest falls. Commodity prices, including oil, coal and iron ore rose during the month.

Looking ahead, geopolitical risks, alongside elevated interest rates and slower economic growth this year, represent potential headwinds for markets. The International Monetary Fund (IMF) is forecasting global growth to be 3.0% in 2023 and 2.9% 2024, which is below the long-term trend rate of growth. However, in broad terms, share markets continue to appear more attractive than most other investment opportunities.

Fund Commentary

The Fiducian Geared Australian Shares Fund declined by 6.5% in September, which was below the index return of -2.8%. Over the last 12 months, the fund has returned 16.7% compared to the index return of 13.5%. Over this period, both Ausbil and First Sentier have outperformed the index.

The broad Australian share market (ASX200 index) declined by 2.8% in September. This decline was in line with world-wide stock market declines due to falling investor confidence and rising bond yields.

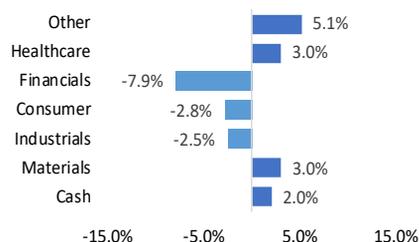

The Energy sector (+1.6%) recorded gains for the month as prices for oil, gas and coal increased. All other major ASX sectors were lower, with Real Estate (-8.6%), Information Technology (-7.9%) and Healthcare (-6.2%) the worst performers.

At an aggregate level, the largest sectoral tilts in the Fund are an underweight to financials, primarily lower returning and less volatile property trusts, with this funding overweight positions in the materials and healthcare sectors. As at the end of September, the average gearing level in the Fund was 43.0%.

Top stock holdings and sector tilts

First Sentier Top Holdings	Weight
BHP Group	13.2%
