

### Fund description

The Fiducian Growth Fund has a large allocation to growth style assets and is diversified between managers and countries, utilising the Fiducian “Manage the Manager” system that aims to achieve superior returns with reduced risk.

Over the long term, the Fund is expected to generate higher returns than funds with a lower allocation to growth assets, but will also be exposed to capital losses when markets turn down.

The Fund is suitable for investors seeking good long term capital growth with possible short term volatility. The recommended holding period is at least 7 years.

### Fund facts

**Portfolio manager:** Conrad Burge  
**ARSN:** 093 543 241  
**APIR code:** FPS0004AU  
**Benchmark:** FE AMI Mixed Asset Growth Index

### Tactical tilts and current asset weights

# Fiducian Growth Fund

Monthly Report - October 2025

## Market Commentary and Outlook

The global economy is forecast to expand this year and the next, according to the latest estimates provided by the International Monetary Fund (IMF). Global growth is forecast to be 3.2% this year and 3.1% in 2026 (both above the IMF's previous forecast). In the IMF's words, 'the good news is that the negative impact on the global economy (of US tariffs) is at the modest end of the range'. Growth in the advanced economies is forecast to be 1.6% this year and in 2026, but with 'risks tilted to the downside'. The IMF is now forecasting the US economy to grow by 2.0% for the whole of 2025 and 2.1% in 2026, although the US administration is aiming for a higher rate of growth than this, with fiscal stimulus, reduced regulation and incentives for investment aimed at propelling growth going forward.

The broad US stock market (S&P 500 Accumulation Index) has been on an uptrend since early April, gaining 2.3% in October alone. The Australian market (ASX 200 Accumulation Index) gained 0.4% over the month, held back by strong third quarter inflation data, causing markets to scale back their expectations for cuts by the Reserve Bank of Australia (RBA). The Australian dollar fell by 1.1% relative to the US dollar. Commodity prices were mixed, with lithium, gold and iron ore posting gains, while oil and natural gas declined over the month.

Key global share markets have been 'pricing-in' a shift by central banks towards less restrictive monetary policy, despite some signs of inflation rising again in some economies. However, share markets are likely to remain volatile until a resolution of trade tensions is achieved.

	Cash 3.6%	BlackRock 2.1%
	Cash	1.5%

## Fund Commentary

The Fund outperformed its benchmark in October, with a return of 1.3%, compared to the benchmark return of 1.1%. For the last 12 months to the end of October, the Fund has returned 10.2%.

There were broad gains across asset classes during the month, with International Equities (+3.6%), Listed Property (+0.7%) and Fixed Interest (+0.5%) being the best performers for the period. Australian Equities (0.0%) was the worst performing asset class over the month.

The Fund currently has overweight positions in International Equities, Listed Property and cash. The exposures to Australian and International Bonds, and Australian Equities are relatively underweight compared to the benchmark. Inflation-Linked Bonds are relatively neutral compared to the benchmark.

In the FE AMI Mixed Asset - Growth Category, the Fiducian Growth Fund returns were ranked 102 out of 162 funds over one year, 54 out of 150 funds over five years, and 4 out of 131 funds over the ten year period to 31 October 2025.
