

Budget Planner

How to use: Firstly choose a time period (e.g. fortnightly or monthly). Write in your regular income and expenses. Remember to use the same time period for income and expenses. Once you have entered these figures, total your expenses and subtract these from your total income. This should then give you your total savings potential.

INCOME			
Amount received each period			
Salary or wage (after tax)	\$	Investment Income (eg. interest, dividends, rent)	\$
Pension or Government allowance	\$	Child support or other payments	\$
Total Income			\$

EXPENSES
