

I NEED TO HAVE MONEY TO SEE A FINANCIAL PLANNER

Nothing could be further from the truth. Tapping into the knowledge and knowhow of a good Financial Planner helps you find out how you can arrange your finances and put into place a structured financial strategy that helps grow your money. Working with a Financial Planner and setting goals and objectives for the future is much more successful than trying to go it alone.

I often get asked about books like Rich Dad, Poor Dad or The Barefoot Investor - are they worthwhile? In short, yes they are, but they are general information, kind of like a text book. Having a series of meetings with a financial planner allows your individual plans to be discussed and a plan tailored to your situation. As life changes reviews of your situation and finances adapt that plan and keep everything working in the best manner.

So do you need to already have money to see a financial planner?

WELL NO, YOU DON'T,

you just need to think about what you want to achieve, and then we have something to work with.
